

## Merchant Plants

The Indiana Utility Regulatory Commission received its first “merchant plant” petition in November 1998, following an early summer price spike in the wholesale power market. Unprecedented wholesale power prices again in the summer of 1999 encouraged the development of merchant plant projects in Indiana. Through March 2001, the IURC received a total of 26 petitions for what were categorized as merchant plant projects. The IURC has not received any new merchant plant petitions since that time.
